

# BreathID<sup>®</sup> Satellite

BREATH TEST SYSTEM

## The Flexible <sup>13</sup>C Urea Breath Testing (UBT) Platform for Multi-Location Practices

- Adopt UBT for all your locations – with a single capital investment
- Establish one standard of care throughout your practice
- Gain enhanced revenue potential through straightforward reimbursement

### BreathID<sup>®</sup> Satellite makes it easy to adopt H. pylori testing in all your offices

*Simply collect breath samples via the Hp BagTest<sup>™</sup> in remote clinics and send for analysis on your BreathID<sup>®</sup> System*

At your main location

- Unique, continuous testing – patient breathes directly into BreathID System
- 10 minute test from start to results<sup>‡</sup>

At your remote locations

- 20 minute test – 5 minutes of staff time
- Send breath samples to your BreathID System
- Results same or next day

### Enhance revenue potential in all your offices with a single investment

*Unlike other UBT options, BreathID Satellite features:*

- Minimal capital investment – no need to buy a system for each office
- Greater patient convenience – test at each location vs. sending patients to your equipment
- Greater revenue potential – bill 83013 & 83014 for all UBT testing vs. using an outside lab

<sup>‡</sup>In a review of 12,783 positive and negative test results, median test duration ranged from 8.02 to 12.98 minutes.
