

At handpiece doctor, we do one thing....and we do it right!

We repair almost any type of air driven handpiece. Handpiece Doctor saves you money by fixing your turbine when the bearings go out instead of you purchasing a new turbine every time. On highspeeds we carefully remove the old bearings and replace them with brand new bearings that meet all manufacturer specs. We also replace all O rings and any other components that are too worn for proper performance. If your turbine is too worn for repair, we may recommend replacing it. We also stock new turbines for major brands. Most repairs returned in 24-48 hours. Additional freight charges may apply.

Warranty

Each handpiece is inspected, repaired and tested in accordance with manufacturer's standards and specifications. We guarantee all material and workmanship for the full period of the warranty and will replace or repair any defects at no charge.

HANDPIECE DOCTOR is now happy to offer sales of new handpieces for those of you in need of updating or replacing old, worn out ones. Our high speed handpieces are designed and manufactured to stringent European standards, yet available at very affordable prices giving you utmost value and confidence. All handpieces are ergonomically designed and can be tailored to your liking with 3 different head sizes and 2 water spray options. Our handpieces offer couplers compatible with most major and better known brands of handpieces; e.g., Kavo, Sirona, W & H, Nsk, Star. Call New Line Medical today and experience the difference!

Testimonials

"Running a state-of-the-art dental practice requires that we have little to no down time with our equipment - Especially our handpieces. At Handpiece Doctor, our handpieces are repaired very efficiently and are returned to us in usually one day! This company has 5-star customer service and also provides some of the most competitive and refurbished rates around."

"I had been a satisfied Kavo handpiece user for years yet, after trying the MK Dent line of handpieces sold by the Handpiece Doctor, I received an upgrade in power, quality and efficiency- at a fraction of the cost of a Kavo handpiece."
