

Auria

Employee Wellness Program

Cancer & Large Employers

- Cancer has overtaken musculoskeletal conditions as the most expensive condition for large employers.
- Breast cancer is a top driver of employer healthcare spend in 2024 mid-year data.
 - #1 condition in \$250k - \$499k claimant threshold
 - #2 condition in \$100k - \$249k & \$500k+ claimant threshold
- Earlier detection of breast cancer saves lives and reduces the cost of treatment.
 - One-year cost of cancer to Simmons increased 80% last year.

Auria Breast Cancer Screening

- Easy & accessible breast health for your employees with Auria, the first at-home biological breast cancer screening powered by tears.
- Auria tests for protein biomarkers that indicate inflammation and abnormalities in breast tissue that can be associated with cancer with high sensitivity of 92% to detect cancer early.
- This program makes financial and organizational sense as a benefit to female employees and preventing downstream costs.

Program Deployment

- Screening kits can be mailed to the homes of eligible covered lives or collected at a screening event.
- Results & follow-up can integrate with existing provider network or as a stand-alone benefit to increase participation and compliance.
- Custom co-branded breast health education & marketing available.

Why we *exist*.

1 in 8

women will develop invasive breast cancer in their lifetime

UP TO 50%

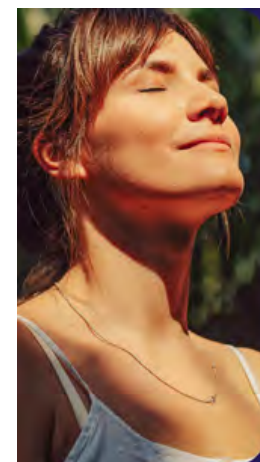

of breast cancers are missed in women with dense breast tissue

54%

of women miss recommended screening mammograms

40+

yet there are no options for women under the age of 40

89% of women diagnosed with breast cancer have no family history.
